

COBY®

TFT LCD Widescreen Television

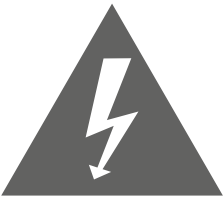

Instruction Manual

TF TV 3227

Please read this manual carefully before connection and use

Precautions

	CAUTION WARNING: SHOCK HAZARD. DO NOT OPEN. AVIS: RISQUE DE CHOC ELECTRIQUE. NE PAS OUVRIR	
CAUTION: TO REDUCE THE RISK OF FIRE AND ELECTRIC SHOCK, DO NOT REMOVE THE COVER (OR BACK) OF THE UNIT. REFER SERVICING ONLY TO QUALIFIED SERVICE PERSONNEL.		

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operation and servicing instructions in the literature accompanying the appliance.

For recycling or disposal information about this product, please contact your local authorities or the Electronics Industries Alliance: www.eiae.org.

For Customer Use:

Enter below the serial number that is located on the rear of the unit. Retain this information for future reference.

Model No. TFTV 3227

Serial No. _____

Precautions

WARNING: To prevent fire or shock hazard, do not expose this device to rain or moisture. Dangerous high voltage is present inside the enclosure. Do not open the cabinet.

Note: If the product suddenly has no response or powers off, an electrostatic discharge may be the cause. In this circumstance, please follow the procedures below for recovery:

- Unplug the unit. Wait 30 seconds.
- After 30 seconds, plug the unit in and turn it on again.

FCC Statement:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

Note:

This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Use of shielded cable is required to comply with Class B limits in Subpart B of Part 15 of the FCC rules. Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Important Safety Instructions

Warnings and precautions

To prevent any injuries, the following safety precautions should be observed in the installation, use, servicing and maintenance of this equipment. Before operating this equipment, please read this manual completely, and keep it nearby for future reference.

Important Safety Instructions

1. Read these instructions: All the safety and operating instructions should be read before the product is operated.
2. Keep these instructions: The safety and operating instructions should be retained for future reference.
3. Heed all warnings: All warnings on the product and in the operating instructions should be adhered to.
4. Follow all instructions: All operating and usage instructions should be followed.
5. Do not use this apparatus near water: (e.g., near a bath tub, washbowl, kitchen sink, laundry tub, in wet basements, or near a swimming pool and the like).
6. Clean only with a soft dry cloth. Never use liquid or aerosol cleaners on the equipment. Always remove the power cord from the outlet before cleaning the equipment.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions: Do not insert anything into the ventilation holes of your equipment. Inserting any metal or flammable objects may result to fire or electric shock. Do not install this equipment in a confined or building-in space such as a book case or similar unit, and remain a well ventilation openings with items such as newspaper, table cloths, curtains etc
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Do not place the equipment on uneven or unstable carts, stands, tables, shelves etc. The equipment may fall, causing serious injury to children or adults and serious damage to the equipment itself. Always place the equipment on the floor or on a surface that is sturdy, level, stable and strong enough to support the weight of the equipment.
14. Unplug this apparatus during lightning storms or when unused for long periods of time.
15. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
16. If you can not fit the plug into the electrical outlet, contact an electrician to install a grounding outlet.
17. Always operate this equipment from the type of power source indicated on the rear of the serial/model plate.
18. Never overload wall outlets and extensions.
19. Use and handle the power cord with care. Do not place any heavy objects on the AC power cord.
20. Do not pull the AC power cord. Do not handle the AC power cord with a wet hand.
21. Remove the plug from the wall outlet, if the equipment will not be used for a long period of time.
22. Do not expose the equipment to extreme temperature or to direct sunlight, as the equipment may heat up and suffer damage.
23. Do not attempt to service the equipment yourself.

Important Safety Instructions

24. Opening and removing the covers may expose you to dangerous voltage or other hazards and may void your warranty. Refer service to qualified personnel.
25. Do not place or drop any other objects on top.
26. Protect the power cord from being walked on or pinched particularly at plugs ,convenience receptacles, and the point where they exit
27. WARNING: The mains plug or an appliance coupler is used as the disconnected device, the disconnected device shall remain readily operable.
28. WARNING: To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture. The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on apparatus.
29.  Protective earthing terminal. The apparatus should be connected to a mains socket outlet with a protective earthing connection.
30. Battery shall not be exposed to excessive heat such as the sunshine, fire or the like. Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.

Important Safety Instructions

Antenna Safety Instructions

If an outdoor antenna is connected, follow the precautions below:

- An outdoor antenna should not be located in any area where it could come in contact with overhead power lines, or any other electric light or power circuits.
- When installing an outdoor antenna system, extreme caution should be taken to prevent contact with power lines. Direct contact with power lines may be fatal and should be avoided at all costs.

Section 810 of National Electrical Code (NEC) provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

Listening with Earphones

- Listen at moderate Volumes to avoid hearing damage.
- If you hear no sound during playback, do not turn the Volume up as the music may suddenly begin at a high Volume. Excessive sound pressure from earphones and headphones can cause hearing loss.
- To avoid damaging your ears, adjust the Volume to the lowest level before playback, and turn up to the desired level when playback has started.

Main Features

Multiple Mode

TV
AV
COMPONENT
VGA
HDMI 1
HDMI 2
HDMI 3

High Quality Property

High Resolution

Adopt an MPEG2 decoding format to achieve horizontal resolution more than 500 lines.

Superior sound

Built-in Dolby Digital decoder to output high quality sound effects.

Screen

Support the picture size of a normal screen (4:3) and a wide screen (16:9)

Panel Information

The panel used in this television contains millions of thin film transistors that have been manufactured using a high-technology process to deliver a crisp, clear, and detailed picture. Occasionally, a few of these transistors may become stuck or non-active; please note that this does not affect the performance of the television.

NOTE: It is normal to experience some light or dark spots appearing on the screen.

Power Supply:

Insert the power plug into the AC100-240V wall outlet. If you have difficulty inserting the plug, turn it over and re-insert it.

Power Management:

- Before plugging the power cord into the AC outlet, make sure that all necessary connections have been properly made.
- If the unit will not be used for a long period of time, disconnect the power and remove the batteries from the remote.

Package Contents

Please make sure the following items are included with your product. If any item is missing, contact your dealer.

a, Main Unit

b, RCA Cable

c, Remote Control Unit

Unit View

Unit View

TFT
Screen

Unit Stand

Remote Control Sensor
Sense the remote control signal.

Power Indicator

Lights bright blue when TV is on, it will dim when TV is turned off (Standby mode).

Mounting
Thread x 4.

Screw X3

These screws are connecting the TV case to the unit stand.

VOLUME +/-
Adjust the sound output level.

CHANNEL +/-
Skip channels.

MENU
Display the system setup menu.

SOURCE
Select a desired working mode.

POWER
Turn the unit on/off(standby).

NOTE: The unit enters into the standby mode after being turned off with the POWER button, and it still consumes power in the standby mode. Unplug the power cord from the outlet completely when it will not be used for a long period of time.

“SERVICE ONLY” is for the engineering use only and not supposed to be utilized by a final user. For more specific details on connector panels, please read the Cable Connection section

Wall Mounting - Attach the TV case to the wall

- This unit can be delivered to a final user either as a wholly assembled product or with the TV case detached from the unit base, depending on different packing methods. If you got the unit as a fully assembled product, you would have to remove the unit stand first before wall mounting. To detach the unit base, release the fixing screws.
- Use the VESA standard mountings to fix the TV case on the wall. Take care when mounting, it may cause damage or serious injury should it fall from its mountings. See the Specification page for VESA information. A variety of mounts are available in your local retailer, see instructions when installing the unit. An adequate space is necessary for this installation. Screws used for mounting purposes shall not exceed 10mm in length.

Remote Control

Remote Control Drawing

1. **POWER**
Press this button to turn the unit on/off (standby).
2. **Numeric Keypad**
Press these buttons to input numeric data as well as to access a TV channel directly.
3. **Sub-channel Selector <->**
This button is usually used with the numeric keypad to tune to a channel substation (e.g., 4-1, 4-2).
4. **VOLUME +/-**
These two buttons are used to adjust the volume up or down.
5. **CH/LIST**
Press this button to display the program list.
6. **P-SIZE**
Press this button to set the screen format.
7. **SLEEP**
Press this button to access the sleep timer.
8. **CC**
Press this button to select a closed caption mode.
9. **GUIDE**
Press this button to access the Electronic Program Guide.
10. **SOUND**
Press this button to select a sound mode.
11. **LIGHT**
Press this button to set the front panel light on/off.
12. **MUTE**
Press this button to turn on/off sound output.
13. **RETURN**
Press this button to reveal the previously viewed channel.
14. **SOURCE**
Press this button to display the source menu, use the up/down direction button to select a desired mode, press OK to enter.
15. **CH+/-**
Press these buttons to skip channels.
16. **MENU**
Press this button to show the system menu.
17. **FAV**
Press this button to display the favorite channel list.
18. **P.Mode**
Press this button to select a picture mode.
19. **Direction & OK**
This set of buttons is usually used when working with system menu, use direction buttons to select a menu option, press OK to confirm settings.
20. **EXIT**
Press this button to exit the system menu.
21. **MTS**
Press this button to set the DTV audio mode.
22. **INFO**
Press this button to show the current working information.

- Remove the battery compartment cover located on the rear of the remote control. Insert 2 x "AAA" batteries, making sure to match their polarities (+/-) to the markings on the inside of the compartment. Replace the cover.

Remote Control

Remote Control

Preparation

- Remove the battery compartment cover located on the rear of the remote control. Insert 2 x “AAA” batteries, making sure to match their polarities (+/-) to the markings on the inside of the compartment. Replace the cover.
- Batteries in the remote will last for approximately 6 months under the normal use. Replace the batteries if the remote control does not work. Do not mix old with new batteries, or different types of batteries.
- Remove the batteries from the remote if it will not be used for a long period of time.

Warnings:

The battery used in this device may present a fire or chemical burn if mistreated. Do not recharge, disassemble, incinerate, or heat the battery (~212°F). Keep batteries away from children.

Using the Remote Control

To use the remote, point it at the remote sensor of the player. Operate the remote within 20 feet of the sensor and at an angle of ± 30 degrees.

The operating distance may vary depending on the brightness around.

Notes:

1. Do not point bright lights directly at the remote control sensor.
2. Do not place objects between the remote control unit and the remote control sensor.
3. Do not use this remote control unit while simultaneously operating the remote control unit of any other equipment.

Cable Connections

Figure. Cable connections

Power Connection

Insert the power plug into the 110-240V AC wall outlet. If you have difficulty inserting the plug, turn it over and re-insert it.

Antenna Connection

Connect TV RF sources to the antenna port. TV RF signals include: receiving antenna/CATV net. You can use 75 Ohm coaxial cable to connect outdoor antenna.

NOTE:

- In poor signal areas, to achieve better picture quality it may be necessary to install a signal amplifier to the antenna as shown above.
- If signal needs to be split for two TVs, use an antenna signal splitter for connection.

Cable Connections

VGA Input - PC Connection

The VGA port of the TV is capable of accepting high-definition signals from computers with a VGA output jack. When used as a computer monitor, connect the VGA jack and the PC Audio In jack with a 15-Pin D-Sub cable and a 3.5mm stereo audio cable. The mentioned cables are not included with this product.

Cable Connections

COAXIAL (S/PDIF) - General Information

This port is usually found on digital audio equipment such as a DAT (Digital Audio Tape) machine or audio processing device. It allows the transfer of audio from one file to another without the conversion to and from an analog format, which could degrade the signal quality. The most common connector used with an S/PDIF interface is the RCA connector, the same one used for consumer audio products. An optical connector is also sometimes used.

COAXIAL(S/PDIF) Connection

Send the TV's audio signal to an external audio equipment via COAXIAL Output port. A 75 ohm coaxial cable is required for this connection. If you want to enjoy digital broadcasting through 5.1-channel speakers, connect the COAXIAL terminal on the back of TV to a Home Theater (or amp).

NOTE: If you can not hear anything after COAXIAL(SPDIF) connection , set the SPDIF as PCM via "Digital Audio/SPDIF" option under the "Audio Menu". See page 12 for details.

CAUTION:

Do not look into the output port. Looking at the laser beam may damage your vision.

External Audio and Video Signal Input - HDMI, RCA, COMPONENT.

The player's AV function would enable users to view programs from external signal sources.

- Three input modes are available for you to choose from, we have them ranked as below in regard to image definition: HDMI, COMPONENT, RCA.

After cable connection, set the unit into the relevant input mode with the Source button to enable the signal pass.

NOTE: We supply one set of AV cable with this product. The white/red plug of the RCA cable is for the audio L/R connection and the yellow plug for the video connection. The white/red plug of the RCA cable can also be used separately to input the audio signal in the S-video/Component connection. The rest of cables required for other necessary connections are not included with this product, please check with your electronic store.

IMPORTANT NOTICE - When work with an external device,

- Be sure to have all necessary connections properly done before connect the power supply.
- Set the unit into the relative input/output mode to enable the signal pass.
- Refer to the manual of external devices as well.

Cable Connections

HDMI 1/2/3 Input

HDMI (High Definition Multimedia Interface) is a new type of connection that transmits digital audio and video signals simultaneously over a single cable. A HDMI cable is required for the HDMI connection. These HDMI input connectors are capable of receiving video at resolutions up to 1080p (1080-progressive). HDMI 1/2 is used in the same application as HDMI 3 illustrated in the below picture.

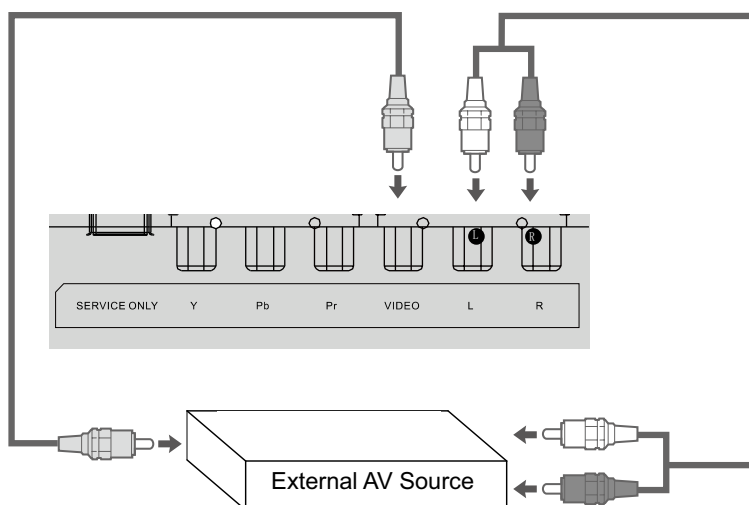

NOTE:

- The TV can receive video and audio signals simultaneously over a HDMI cable.
- If the external AV device does not support Auto HDMI, you must set the output resolution appropriately.
- Check that your HDMI cable is version 1.3 or higher. If the HDMI cables don't support HDMI version 1.3, flickering image or blank screen can be a result. Please use the latest cables that support at least HDMI version 1.3.

AV Input

The CVBS port is capable of accepting signals from standard video sources(e.g., cable/satellite boxes, DVD players, VCRs, etc.)

1. Connect the VIDEO port with the yellow plug of the the supplied AV cable.
2. Connect the L, R port with the white/red plug of the supplied AV cable.

Cable Connections

Component Input (Y Cb/Pb Cr/Pr)

The component port is capable of accepting high-definition signals from standard video sources. (e.g., cable/satellite boxes, DVD players, VCRs, etc.)

1. Connect the Y, Pb, Pr port by the component cable to input the video signal. Component cable is not included with this product.
2. Use the red/white plug of supplied AV cable to connect R,L port for audio transmission.

TV Function

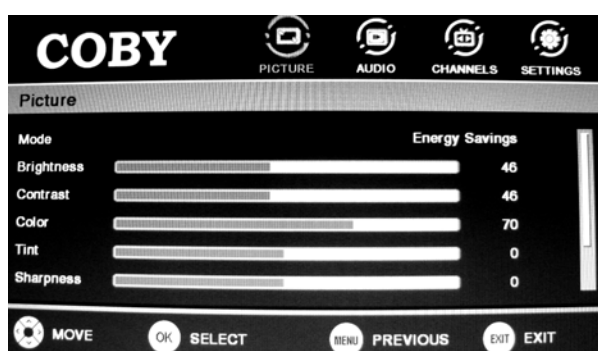

Preparations

1. Connect cables.(Refer to the “Cable Connections” section for details).
 2. Press the POWER button to turn on the player.
 3. Select the TV signal mode, using the SOURCE button.
 4. Press CH+/- to skip channels. Or you can use number buttons to access a channel directly.
- For an initial use, you need to scan channels under the Channels Menu, please follow steps below. Press the MENU button to display system menu window, use direction buttons to access the CHANNELS menu. In the Channels menu, select "Auto Channel Search", press OK to enter - - > Set the TV source as Antenna/Cable (ATV/DTV) - - > Select "Start", press OK to scan. To quit, press MENU.

System Setup Menu

Various features can be preset through the setup menu, please read this section carefully.

- Press MENU to display the system menu window.
- Press the left/right direction button to select the desired menu, press the down direction button or the OK button to enter.

While working with the menu,

Always use direction buttons to select an option, press OK to confirm. Press MENU to back up/exit the setup menu, or press EXIT to quit.

Note: Menu option availability is dependent on the TV's current input source mode. Options that are grayed out are not selectable from the current mode.

Picture Menu

ITEM	DESCRIPTION
Mode	- Setup the picture mode as Custom/Sports/Theater/Energy Savings/Standard/Vivid.
Brightness/Contrast/Color/Tint/Sharpness	- Press the left/right direction button to adjust settings. When you select a picture Mode other than "Custom", these items are automatically given parameters to correspond with the chosen preset mode, so any change to these parameters would return the Mode setting to "Custom".
Advanced Video	- Press the right button to enter this option. Aspect Ratio - Set the screen aspect ratio as Normal/Zoom/Wide/Cinema. Color Temperature - Set color preference as Cool/Normal/Warm. Noise Reduction - Set the noise reduction function as Off/Low/Middle/Right. Adaptive Contrast - Set the adaptive contrast function on/off. Over Scan - Set the over scan function on/off.
Reset Picture Settings	- Select this item and press OK or the right direction button to set all items under this menu to the factory default.

TV Function

Audio Menu

ITEM	DESCRIPTION
Mode	Set the audio mode as Custom/Standard/Theater/Music/News.
Treble/Bass/Balance	Press the left/right direction button to adjust settings. When you select an audio Mode other than "Custom", these items are automatically given parameters to correspond with the chosen preset mode, so any change to these parameters would return the Mode setting to "Custom"
Digital Audio/SPDIF (COAXIAL)	Set Digital Audio/SPDIF as RAW/PCM. SPDIF RAW is to be used when you have a receiver that can decode the signal. While SPDIF PCM is to be used when you do not have the ability to decode the signal. SPDIF RAW is the preferred option, if you can't hear anything then switch to PCM
MTS/SAP	Set the ATV audio mode as Mono/Stereo/SAP.
Audio Language	Set DTV audio languages.
Reset Audio Settings	Select this item and press OK or the right button to set all items under this menu to the factory default.

Channel Menu

ITEM	DESCRIPTION
Auto Channel Search	Scan and save all available channels automatically, overwriting previously stored channels. Select this item, press OK to enter - - > Set the TV source as Antenna/Cable (ATV/DTV) - - > Select "Start", press OK to search channels. To quit, press MENU.
Add/Skip Channels	This option would enable users to avoid unwanted programs. Select this option, press OK to enter - - > Use direction buttons to select a channel you want to skip, press OK to confirm. To reveal the hidden channel, press OK again.
Favorite	Make a favorite channels collection. Select this option, press OK to enter - - > Use direction buttons to select a channel, press OK to mark it as a favorite channel. To disable the setting, press OK again.
Channel Labels	This option provides users with the ability to name their own programs. Select this option, press OK to enter - - > Locate a channel you want to put a label - - > When edit labels, use the left/right direction button to move left/right, use the up/down direction button to change characters - -> Press OK to display "Yes/No" box, select "Yes", press OK.
Channel Strength	Display the DTV signal intensity.
Audio Only	Set audio output on/off.

TV Function

Settings Menu

ITEM	DESCRIPTION
Parental Controls	<p>You are required to enter the 4-digit password to access this option. The initial password is 0000.</p> <p>Button Lock - This option would enable users to lock buttons on the unit panel.</p> <p>Block Unrated TV - This option would enable users to lock unrated TV program.</p> <p>USA Parental Locks - Setup the US parental control. TV(TV Rating) - Y, Y7, G, PG, 14, MA. MPAA(Movie Rating) - PG-13, R, NC-17, X, N/A, G, PG)</p> <p>Canadian Parental Locks - Setup the Canada parental control. Select this option, press OK to enter. There are English Rating and French Rating. Use direction buttons to select the rating level, press OK to confirm, press MENU to back up menu. English Rating - E, C, C8+, G, PG, 14+, 18+. French Rating - E, G, 8ans+, 13ans+, 16ans+, 18ans+.</p> <p>Change Password - To change the password, input the new password -- > Verify again. Please remember the password since the player's reset function would not revert the password.</p> <p>RRT5 Settings - Set the rating region table.</p>
Closed Caption	<p>Select this option, press the right direction button to access the Closed Caption menu. There are four options listed under the Closed Caption menu.</p> <p>Mode - Set the closed caption mode as CC Off/CC On/CC On Mute.</p> <p>Analog Caption - Set the analog caption type as CC1~3/Text1~4/Off.</p> <p>Digital Caption - Set the digital caption type as CS1~6/Off.</p> <p>Digital CC Settings - Press the right direction button to enter CC Settings menu, set "Style" as "Custom" to edit CC type to your own preference. Press MENU to back up.</p>

TV Function

Settings Menu

ITEM	DESCRIPTION
Time	<p>This option would enable users to adjust Date/Time information as well as to setup the sleep timer.</p> <p>Date/Time - Enter this option, set "Mode" as "Auto" / "Custom". When Mode is set as "Auto", system would adjust date/time information automatically after you select a desired Time Zone. When Mode is set as "Custom", you can customize year/month/day/Hour information by your own standards, using direction buttons to write in data.</p> <p>Sleep Timer - Unit will shut down automatically on Sleep Time. The available option is 5/10/15/30/45/60/90/120/180/240 min/Off. The count down would start immediately after setting. You can access this function by repeatedly pressing the SLEEP button on the remote also. To check the timer left, press the SLEEP button on the remote once. To cancel the sleep timer, set the timer to Off.</p>
Menu Settings	<p>Transparency - Set OSD (On-Screen-Display) transparency.</p> <p>Language - Set OSD languages.</p>
Computer Settings	<p>This option is available for the VGA mode and to be used to adjust PC parameters.</p>
Reset to Default	<p>Set the unit to the factory default.</p>

AV Function

The player's AV input function would enable user to view programs from external signal sources. When input AV signals, read the user's manual of the external device as well.

1. Connect the external AV signal source. Refer to the "Cable Connection" section for details
2. Use the SOURCE button to select the relevant AV mode (AV, S-Video, Component, HDMI).

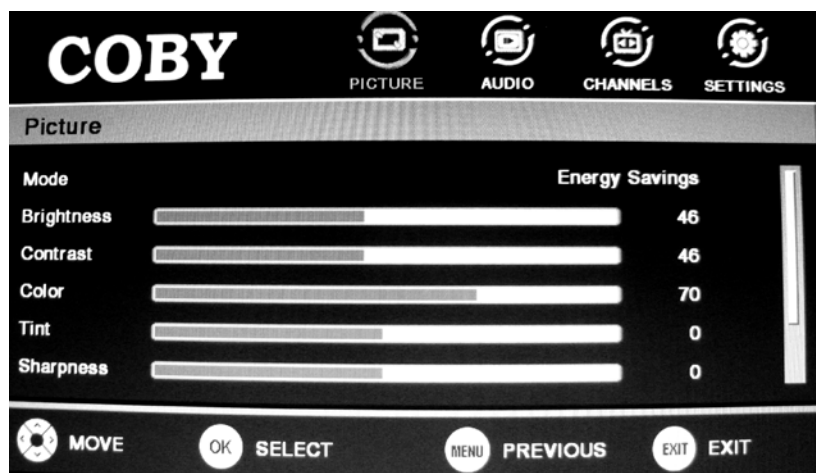

System Setup Menu

Various features can be preset through the setup menu, please read this section carefully.

- Press MENU to display the system menu window.
- Press the left/right direction button to select the desired menu, press the down direction button or the OK button to enter.

While working with the menu,

Always use direction buttons to select an option, press OK to confirm. Press MENU to back up/exit the setup menu, or press EXIT to quit.

NOTE: Please see the TV section for menu descriptions.

Note: Menu option availability is dependent on the TV's current input source mode. Options that are grayed out are not selectable from the current mode.

PC Function

The unit's screen can be used as your computer's monitor.

1. Shut down PC and this unit, connect the VGA jack and PC Audio In jack with a 15 -Pin D-Sub cable and a 3.5mm stereo audio cable. See the "Cable Connection" section for details.
2. Turn on both units and use the SOURCE button to select VGA

Important Notice

- There may be interference relating to resolution, vertical pattern, contrast or brightness in PC mode. Change the PC mode to another resolution or change the refresh rate to another rate or adjust the brightness and contrast of your PC until the picture is clear. If the refresh rate of the PC graphic card can not be changed, change the PC graphic card or consult the manufacturer of the PC graphic card.
- The synchronization input waveform for Horizontal and Vertical frequencies are separate.
- We recommend using under 5m of cable. This provides the best picture quality.

System Setup Menu

Some of the PC features can be preset through the setup menu, please read this section carefully.

- Press MENU to display the system menu window.
- Press the left/right direction button to select the desired menu, press the down direction button or the OK button to enter.

While working with the menu,

Always use direction buttons to select an option, press OK to confirm. Press MENU to back up/exit the setup menu, or press EXIT to quit.

Adjust the PC Screen via System Menu

Upon switching to the PC mode, the monitor will be automatically regulated for a proper functioning. If the result is not up to your expectation, please adjust the monitor manually via the "Computer Settings" menu which is listed under the "Settings" menu.

Trouble Shooting

If you have a problem with this device, please read the troubleshooting guide section and check our website at www.cobyusa.com for Frequently Asked Questions (FAQs) and firmware updates. If these resources do not resolve the problem, please contact Technical Support.
